### DETAILED ACTION

1. Claims 17-24 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 5.
2. Color photographs and color drawings are acceptable only for examination purposes unless a petition filed under 37 CFR 1.84(a)(2) is granted permitting their use as acceptable drawings. In the event that applicant wishes to use the drawings currently on file as acceptable drawings, a petition must be filed for acceptance of the color photographs or color drawings as acceptable drawings. Any such petition must be accompanied by the appropriate fee set forth in 37 CFR 1.17(h), three sets of color drawings or color photographs, as appropriate, and an amendment to the first paragraph of the brief description of the drawings section of the specification which states:

The patent or application file contains at least one drawing executed in color. Copies of this patent or patent application publication with color drawing(s) will be provided by the U.S. Patent and Trademark Office upon request and payment of the necessary fee.

Color photographs will be accepted if the conditions for accepting color drawings have been satisfied.

3. Claims 1-16, and 25-29 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. The calcium silicate mixture containing foshagite and xonotlite having XRD patterns shown in Figures 1 and 4 (see also pages 11 and 12) is critical or essential to the practice of the invention, but not included in the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976).

The claims would be allowable if the deficiency is corrected by amendment to the claims.

4. Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claim appears redundant since foshagite and xonotlite is already claimed in claim 1 from the claim depends from. Thus, it is not not known what is intended to be claimed.

5. Claims 1-16, and 25-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Weigl et al (WO 8402727) or King et al (CA 656,411).

The references disclose hydrothermally created calcium silicate filler for papermaking. Inherently some foshagite is expected to be formed in the hydrothermal reaction that forms the xonotlitic filler of Weigl et al or King et al. The present claims do not contain further limitation as to the nature of the calcium silicate mixture to patentably define over the prior art. Therefore, it is obvious that the references show the claimed calcium silicate filler.

6. Applicant is requested to review the extensive specification including the claims for spelling errors, In particular "xonotlite", " riversideite" and "foshagite"
